

Foggy Hollow Ranch-Traditional 1927® Shetland Sheep Fleeces

Official Fiber
Provider

Foggy Hollow sheep do not wear coats, but most fleeces have minimal to low VM because the sheep are on pasture year-round and are supplemented with hay for only two months. Rooping also helps remove debris from the fleece. Some tips are dirty, but the dirt can be removed during the scouring and carding processes.

If you would like to purchase a fleece, please send an email. We will find out the cost of shipping, then send you an invoice that can be paid via PayPal or a credit/debit card.

Thanks for your interest in our sheep and fleeces.
